

PLAY ON **VECTOR**

VECTOR gives **players** true ownership and control of their games through verifiable on-chain keys, fair fees, and access to a secondary marketplace, while giving **developers** the freedom to publish, price, and distribute their games on their own terms.

**Meet
Luis!**

The VECTOR cat, our cool little mascot with big main character energy!

*“Built by gamers and developers,
for **gamers and developers.**”*

A half-trillion-dollar industry built on temporary access and one-sided economics.

**Gaming is
broken
for both
players and
developers.**

For Gamers

- You pay for access, not ownership.
- Games can be removed or accounts banned libraries vanish.
- You can't resell, trade, or transfer what you buy.

For Developers

- Platforms take up to 30 % of every sale.
- No secondary market.
- Games can be delisted arbitrarily.

VECTOR
restores
ownership
and fairness
to **gaming.**

For **Gamers**

- Own Your Games – Each purchase comes with a verifiable, transferable key.
- Freedom to Resell – Trade or resell when you're done; your library is truly yours.
- Permanent Access – Games stay in your collection, no bans, no removals.

For **Developers**

- Fair Fees – Lower distribution costs and transparent revenue splits.
- Royalties on Resales – Earn recurring income beyond the first sale.
- Control and Stability – Keep your titles live, free from outside platform pressure.

**A marketplace where players truly own,
and creators are rewarded every time their
games are enjoyed.**

How PlayOnVECTOR Works.

Developer Integration

Seamless for Studios

Unity, Unreal, and Godot SDKs plug directly into existing workflows. Plugins handle validation, ownership checks, and royalties.

2

Player Experience

1

Simple for Gamers - Buy, play, and resell with ease in a familiar client. Every purchase creates a verifiable key in your library.

Infrastructure Layer

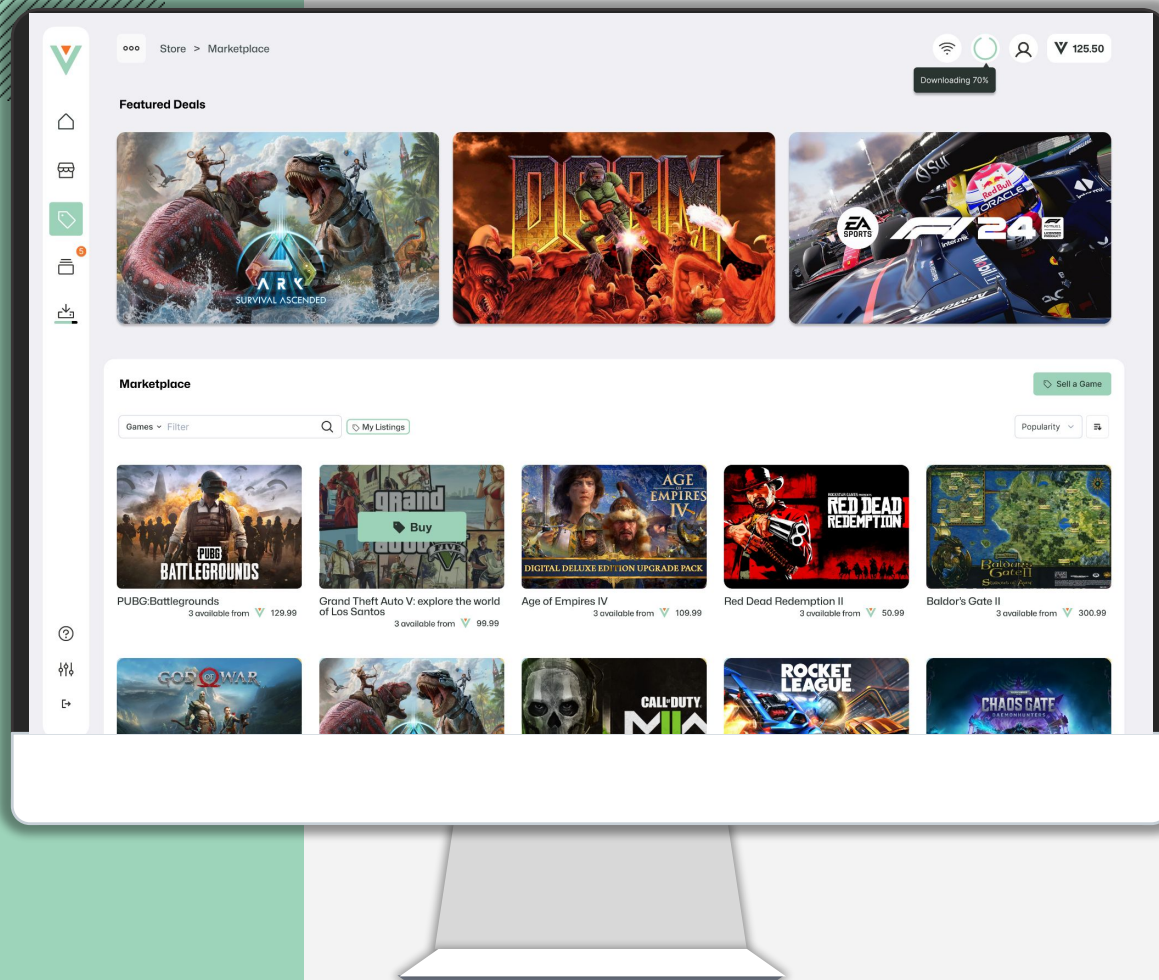

3

Secure and Scalable

Transactions and ownership records run on a robust blockchain, built for security, scalability, and long-term reliability.

Built for Developers.

Integrate once. | Publish everywhere. | Earn perpetually.

Simple SDK Integration

- Plug-and-play for Unity, Unreal & Godot.
- Works with existing build pipelines.

Automatic License Validation

- API handles ownership checks and royalties.
- No blockchain knowledge required.

Developer Dashboard

- Manage titles, pricing, and royalties in one place.
- Real-time analytics on resales and earnings.

Underlying Tech.

**Secure,
Scalable
& long-term
Reliability.**

Layer	Purpose	Core Function	User	Outcome
Client Layer	Front-end platform	Buy, play, resell	Gamers	Seamless experience
Plugin & API Layer	Middleware logic	Validate licenses & ownership	Developers	Automated royalties
Developer SDKs	Engine Integrations	Unity, Unreal, Godot	Developers	Easy adoption
Infrastructure Layer	Backend Services	Secure, redundant, scalable	Platform	Reliable performance
Marketplace Logic	Commerce engine	Handles all sales & payouts	Gamers + Devs	Fair value distribution

Market Opportunity - Gaming is a massive market that's ready for true **ownership**.

Industry Numbers.

Active Gamers

3.3 billion active gamers in 2026.

Current Market

Current market worth an estimated \$522B.

Forecast

Forecast to surpass \$691B by 2030.

A half-trillion-dollar annual market, but players still don't own what they buy.

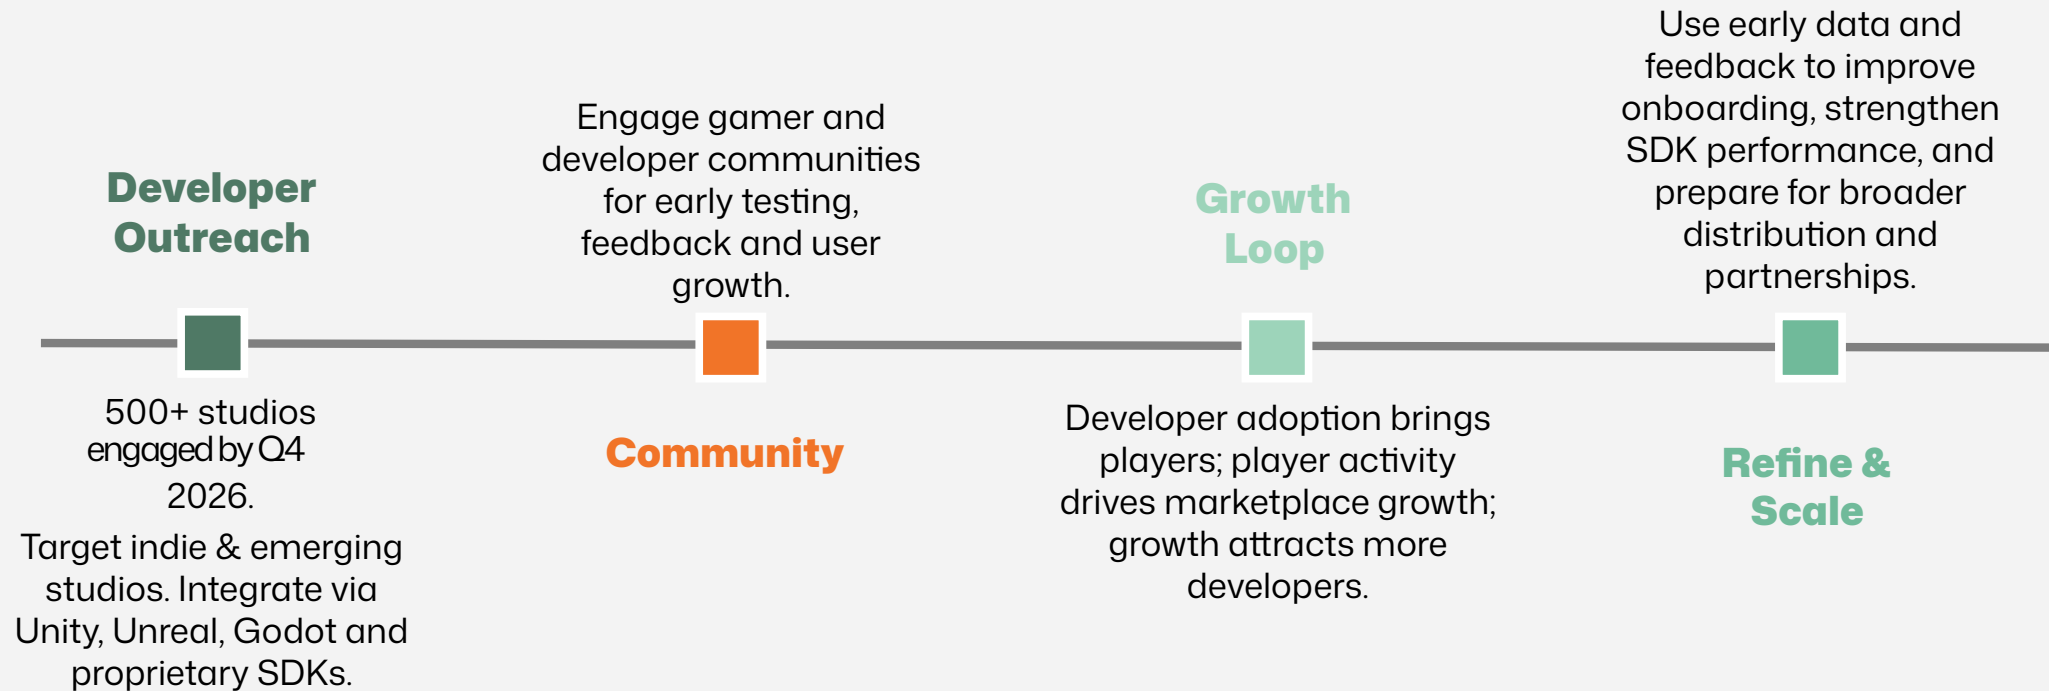

**Focused
on open
ecosystems
where
marketplaces
already
thrive.**

	Total Addressable Market	Serviceable Available Market	Serviceable Obtainable Market
Value	\$691B Forecasted Annual Global gaming industry spend	\$35 B – PC & Mac digital distribution	\$1 B – Indie & mid-tier studios open to resale
Audience	3.3 B gamers worldwide and growing	1.75B+ PC & Mac gamers (install base)	50 K independent and mid-size studios
Focus	All gaming platforms	Open ecosystems only PC & Mac	Early adopters seeking fair fees & recurring royalties
Opportunity	Global potential for real digital ownership	Concentrated digital spend on open platforms	First \$100 M revenue opportunity via resale model

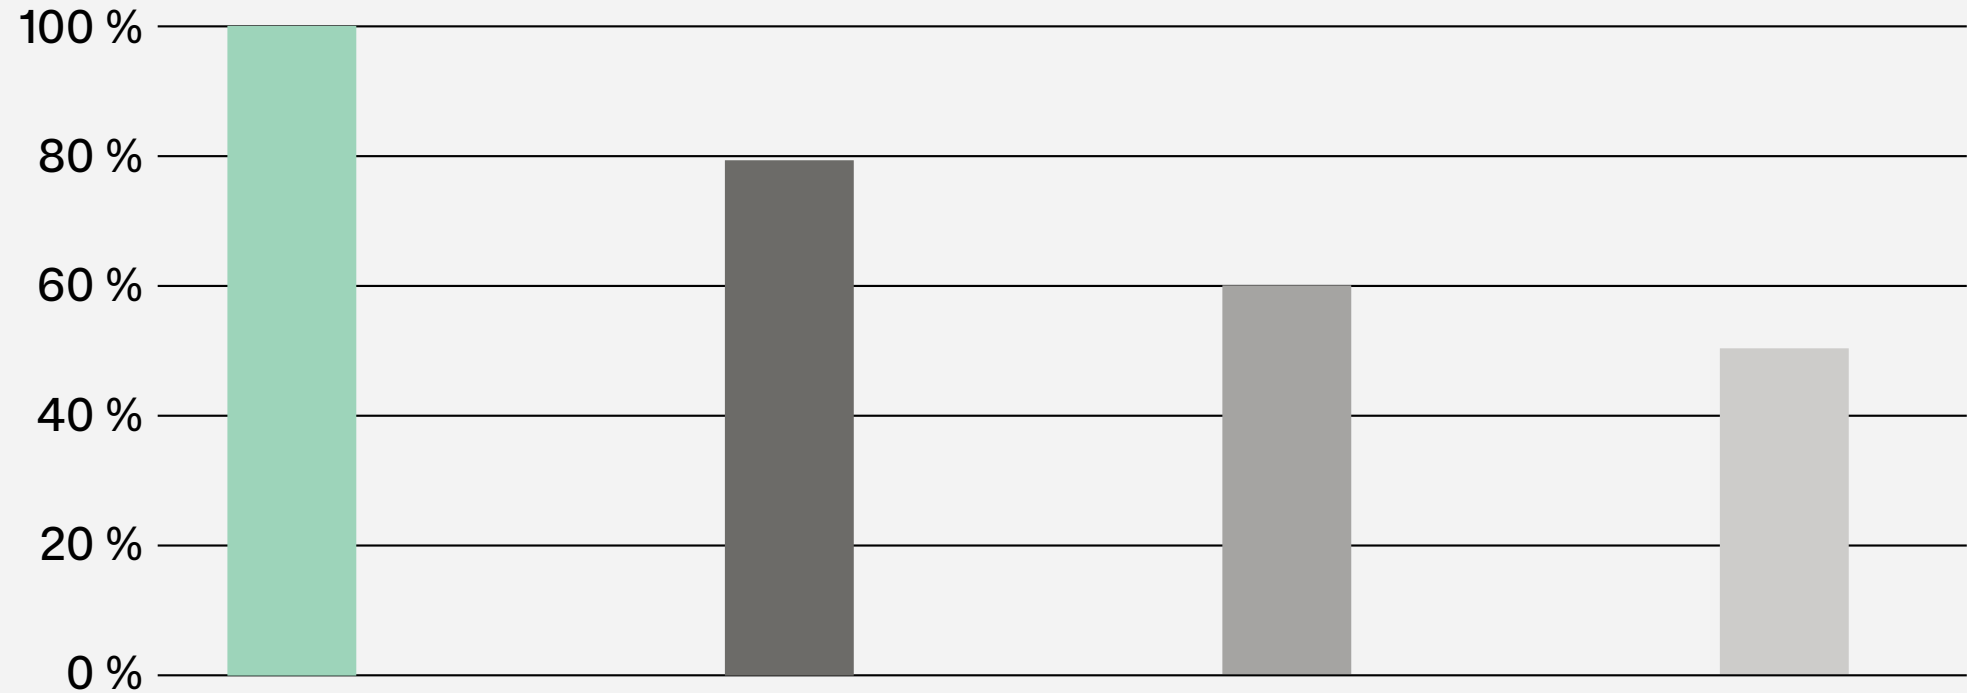

Targeting early adoption through **developer** communities and **gamer** networks.

Traction (Early Validation).

Functional Client

PC & Mac client released for internal testing.

SDK Testing

Unity, Unreal & Godot integrations working with 5 studios.

Internal Testing & QA

Closed Alpha testing phase refining UX and performance.

Developer/Studio Pipeline Growing

In talks with +25 Studios

Value Capture.

- Platform Fees**
Fees on each transaction, shared by Publisher, Developer and Platform.
- Royalties**
Developers earn from every sale & resale.
- Blockchain Transactions**
Ownership secured and verified on-chain.
- User Growth**
True ownership and resale incentives grow users.
- Developer Retention**
Fair rewards incentivize developers to publish more.

Cap Table Structure.

Seed/Series A/B

20% - Current and future investors.

Foundation/Treasury

10% Ecosystem funding.

DAO/Community Pool

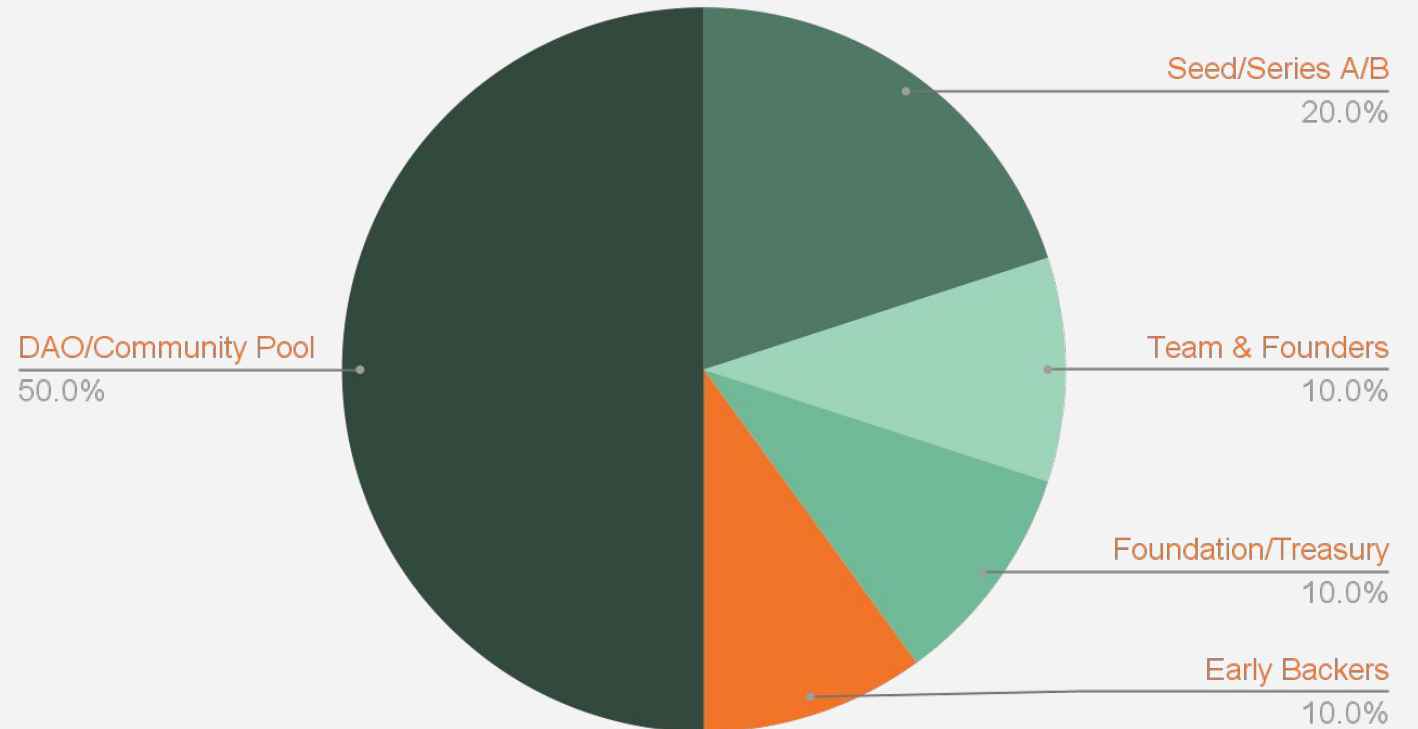

50% - Community driven governance and incentives.

Team & Founders

10% - Long-term alignment with network growth.

Early Backers

10% - Strategic early supporters.

18

MONTHS
OF GROWTH

Raising **\$2.5M** Seed Round @ **\$25M** Valuation.

Fueling PlayOnVector's next 18 months
of growth and go-to-market execution.

- Launch Go-To-Market Phases 1 & 2.
- Onboard 500+ studios and reach 500K players.
- Expand SDK, client, and infrastructure scalability.
- Strengthen developer and player ecosystem growth.

Use of Funds.

Marketing & Go To Market

50% - Grow user and developer base.

Product & Development

15% - Refine client UX, SDK tools, and infrastructure.

Ops & Compliance

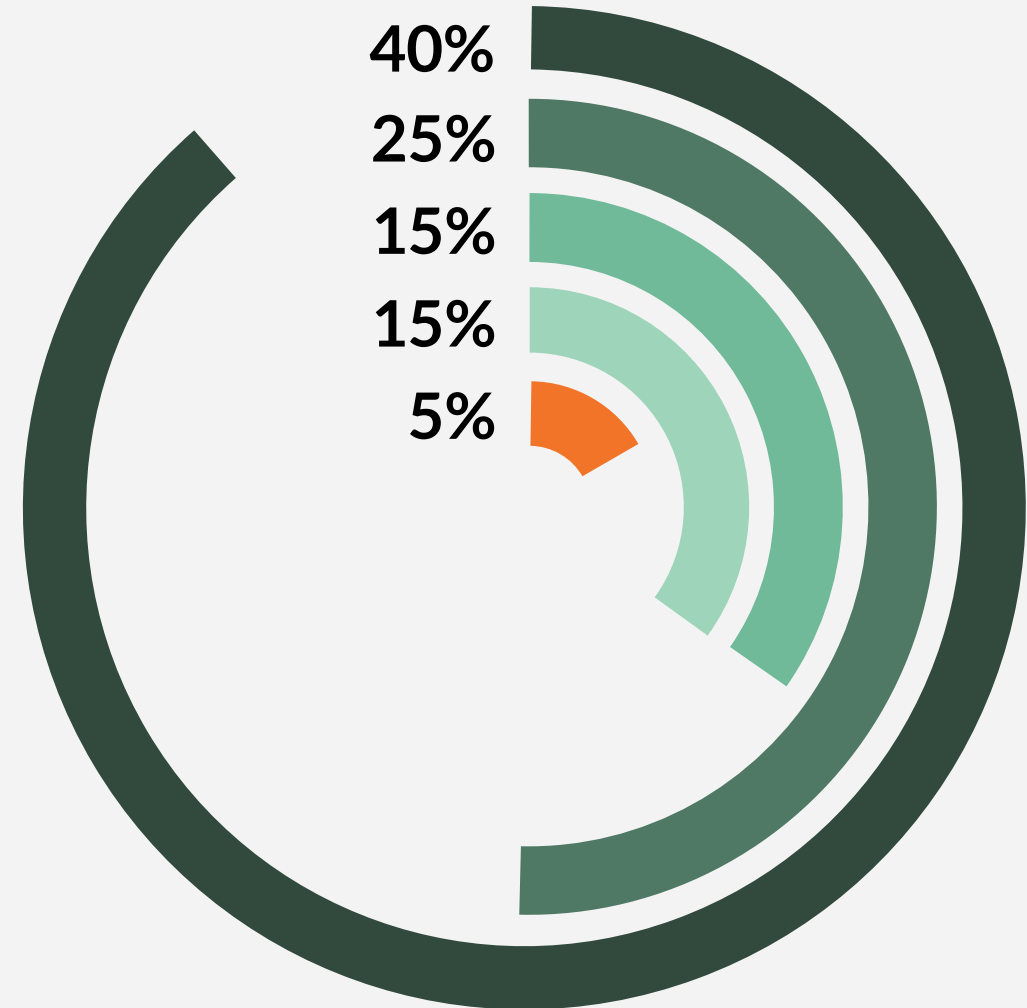

15% - Legal, payments, and licensing.

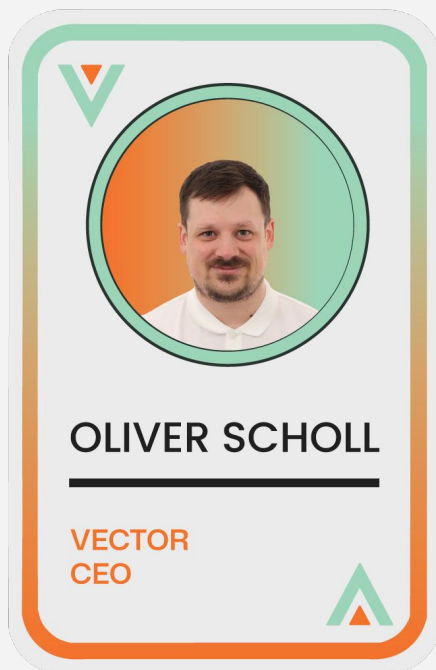

Team Expansion

15% - Key technical and growth hires.

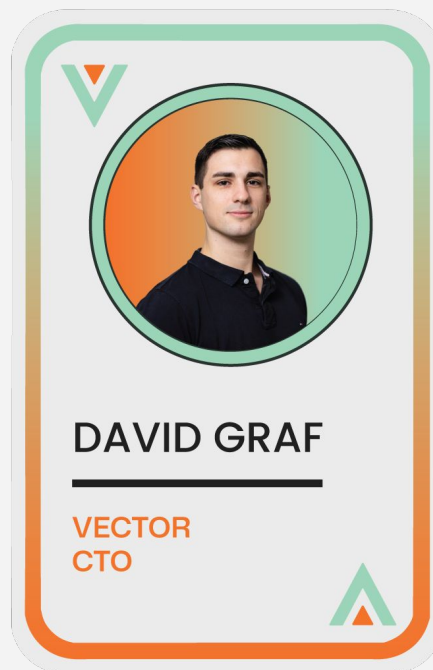

Reserve

5% - Contingency.
